Work Experience

MioAssicuratore — Rome, Italy (remote)
Junior Software Engineer — August 2019 - May 2021

- Transitioned codebase architecture from monolith to microservices
- Designed API endpoints for mobile app integration
- Implemented Firebase analytics allowing the company to make data-driven decision regarding UX

TwoTwentyThree — London, UK (remote)
Mid-Level Software Engineer — May 2021 - February 2023

- Helped design enterprise-level CI/CD using Terraform, CircleCI, Docker
- Designed database schemas for website with millions of monthly unique users
- Developed highly flexible and dynamic web pages integrated with Contentful CMS, enabling non-technical users to modify content

USAData — New York City, NY, USA (remote)
Senior Software Engineer — October 2022 - May 2024

- Built a greenfield customer-facing web app and internal admin tools, integrating data visualization, automation, and complex form handling to streamline workflows
- Designed an adaptive UI/UX, enabling seamless user interactions while balancing flexibility and performance
- Implemented Test-Driven Development (TDD) and performance monitoring, ensuring a highly scalable, maintainable, and efficient application

Projects

Goodwill Hunting *Javascript, React, PostgreSQL, CSS* https://github.com/giovannistasi/good-will-hunting
Prototype of a CRUD web app based on the concept of time banking

Angular Sketch *Angular, Node.js, Socket.io* https://github.com/giovannistasi/angular-sketch
Real-time multiplayer web version of pictionary

Porto Club Zürich Website *Typescript, React, Node.js, Redux, SCSS*
https://github.com/giovannistasi/portoclub
Collaboration with one other developer on large React/Redux project. Implemented visual redesign, Facebook API and SMTP integrations, and user authentication. Enhanced the backend to support role-based access and image storage in a NoSQL database

Education

University of Bologna — Bologna
Master's degree Health Economics and Management — Sep 2017 - Jul 2019

Codeworks — Barcelona, Spain
Intensive Software Engineering Bootcamp — Jan 2020 - Apr 2020

Skills

Languages:	JavaScript, Typescript, Python
Frameworks & Libraries:	React, Node.js, Next.js, Vue, Angular
Tools:	Docker, AWS, Git, Figma, Jira
CI/CD:	Jenkins, CircleCI, Terraform, Github Actions
Testing:	Jest, Cypress, Selenium
